PROJECTS

Employee-management-system

Developed a Python-based employee management application.

Implemented employee record management with CRUD operations.

Utilized file handling/database concepts for data storage.

Portfolio-website

Designed and developed a personal portfolio website using HTML, CSS.

Showcases technical skills, certifications, and projects in a responsive layout.

E-commerce sales analytics dashboard

Tech stack : Python, Power BI, DAX, Excel

Developed an interactive 3-page Power BI dashboard to analyze 10K+ e-commerce sales records, tracking sales, customer, and product performance through KPIs and interactive visualizations.

Performed data cleaning, preprocessing, feature engineering, and EDA using Python, and created DAX measures for key business metrics including Sales, Profit, Orders, and Profit Margin.

Delivered actionable business insights using interactive dashboards, slicers, and trend analysis, enabling data-driven decision-making and performance monitoring.

CERTIFICATES

Data analytics with AI

python fundamentals

Web development

Cyber security fundamentals

Django flask

Generative AI content creation
